Stream
The digital backbone to your business

Founded in 2007 Stream are a privately owned ISO27001, IS09001, G-Cloud approved telecommunications provider. Our mission is to deliver secure, resilient digital communications and cloud services that provide a clear return on investment for wholesale and private markets.

Stream has a valuable range of knowledge and skills that enable us to both discuss strategy on the one hand, whilst being able to deliver rapid programs to manage change on the other. Whether it's high-level discussions to outline new ways of communicating, or highly tangible deliverables, such as cost reduction, planning new ways of working, or proven ways to improve communication, Stream can help transition your communication and business support platform to the brave new world of unified communications and 'information everywhere'.

THESE ORGANISATIONS DEPEND ON OUR NETWORK:

OUR ACCREDITATIONS INCLUDE:

Stream
The digital backbone to your business
Our Partner Program

Our Wholesale ISP Partner Program for Managed Service Providers, Software Developers and Telecoms providers that delivers business critical connectivity, cloud servers and security.

Wholesale ISP Partners who join the Stream Networks authorised program benefit from our dedicated 24x7x365 proactive support team, wholesale pricing and access to our range of business grade Cloud, Connectivity and Voice solutions.

DEDICATED WHOLESALE ACCOUNT MANAGEMENT

Because our Partners are people not account numbers Stream provide dedicated account managers to help with increasing sales and training for your teams.

UK BASED SUPPORT

Our dedicated wholesale technical support teams operate 24x7x365 to ensure your customers stay connected and you receive proactive, helpful connectivity and cloud support

COMPETITIVE PRICING

Because Stream own and operate our own fibre network and cloud infrastructure we provide some of the leading wholesale discounts in the UK.

WHITE LABEL

All of our services are available on a whitelabel basis from Broadband realms, wholesale layer 2 ethernet and LT2PDSL access to whitelabel cloud services, with Stream selling your own branded comms and cloud is easy.

LEADING CONNECTIVITY AND CLOUD PORTAL

Our leading portal Cascade provides live ordering, software defined networking, fault logging, networking monitoring, network changes and security on broadband, fibre ethernet leased lines, MPLS, SD-WAN, Mobile Broadband, cloud servers and DDoS Scrubbing

OUR NETWORK

Our purpose built Juniper Software Defined fibre network provides broadband and fibre access to over 2 million on net UK post codes. In additon our network provides multi-homed fast transit links and peering. This provides guranteed connectivity for latency critical applications such as Voice and Video.
