

CyberAssess

A Comprehensive Cybersecurity Audit

What is CyberAssess?

CyberAssess is our service for Cybersecurity Audit and Assessment.

Cybersecurity audits are crucial to any organisation's risk management and mitigation strategy. In a world where cyberattacks are prevalent, impacting even the most prominent companies globally, it is vital to safeguard your organisation.

With CyberAssess, we can evaluate your existing cybersecurity measures and compare them against long-standing, established security benchmarks relevant to your sector.

This will enable you to create a budgeted plan and roadmap with timelines for implementing a robust, cost-effective cyber defence system, providing you and your stakeholders with peace of mind.

What's Included?

Assess, Plan, Implement

CyberAssess tools and consultancy assist you in identifying where the cyber risks lie, their potential impact, and the associated costs. With the support of our expert-qualified consultants, we can help you plan, budget, and implement the appropriate cybersecurity systems and solutions to meet and exceed industry-standard benchmarks.

Your Trusted Consultant

We combine logic, skills, and nearly 20 years of knowledge and experience to give you peace of mind.

Measurable Compliance

Our dashboard gives you instant access to your security status, identifying compliance and required improvements.

Meet Compliance and Best Practices

By identifying, managing, and mitigating security risks, you can rest assured that you will continuously meet and exceed best practices.

Assess, Plan, Implement

Benchmarking

CyberAssess can align your business with widely recognised standards such as Cyber Essentials, ISO 27001, NIST, and various other frameworks. We can assist in planning, implementing, and maintaining any further gaps or enhancements.

Detailed Roadmap

CyberAssess provides comprehensive analyses of Cyber Risk compliance. It highlights areas of both adherence and underperformance, offering a holistic roadmap for advancing your Cyber Strategy.

Risk and Impact Assessment

Our team of qualified consultants will assist you in understanding the risks and impacts of cyberattacks on businesses like yours, demonstrating the financial return on any cyber investment or strategy.

Risk Dashboard

The CyberAssess modelling tool features a Strategic Dashboard that visually illustrates risk areas and benchmarks compliance in a clear and direct manner.

The Result

Compliance and Investment Return

Demonstrate Cyber Compliance

By conducting regular audits, you can demonstrate your organisation's compliance to stakeholders, board members, customers, suppliers, and other industry partners. Benefit from annual checks to support ongoing compliance with new or revised standards.

Budget Planning

CyberAssess assists in planning suitable budgets to effectively address risks, considering both priority and best-value order, to maximise ROI.
